

Webinar

—

“Towards open data sharing in archaeometallurgy of iron. The CHIPS database and ongoing projects.”

(The schedule is given according UTC+1 time zone)

13h20 : Introduction

13h30 : Philippe Dillmann, Alexandre Disser, ‘The use of chemical data in archaeometallurgical studies on iron. Principles, recent results and prospects’

14h00 : Alexandre Disser, Philippe Dillmann, Enrique Vega, ‘Physico-chemical characterization of ironmaking-linked archaeomaterials: a review of analytical methodologies and possible database inputs’

14h30 : Sylvain Bauvais, Alexandre Disser, ‘The CHIPS database: from datasheet to Relational database management system’

15h00 : Gaspard Pagès, Alexandre Disser, Laurent Costa, ‘Integration of chemical data in a transdisciplinary webmapping application’

15h30 : Guillaume Huitorel, Luc Leconte, ‘Agricultural tools from rural settlements in Ile-de-France. Presentation of the corpus and contexts, and potential insights from chemical data’

16h00 : Alexandre Disser, ‘Some practical aspects about a would-be CHIPS-based application: hosting, data and community management, etc’ followed by a time for free discussion
